

OFF ROAD WAIVER: Big Green Truck Pizza

- We do not recommend driving Big Green Truck on anything other than pavement.
- The weight of the truck is 13,000 lbs (at a minimum). They will leave an imprint of an inch or more on the grass. They can crush septic lines, wells and sprinkler systems.
- Even if the ground appears firm and dry; sink holes and soft spots can be undetectable and may cause the truck to sink into the yard.
- Our drivers are not experienced in off road operation of this vehicle and we make NO representation as to their abilities to navigate obstacles in your back yard or perform any specific turns. The staff is not obligated to undertake anything they deem unsafe, regardless of whether or not someone else has been able to do that before.
- All our trucks are generally booked for multiple events throughout the day/weekend. Should they become stuck, we will call a professional towing company to pull the truck out. We will add the cost of the tow to the bill for the party. We are not responsible for repair of any damage to the property resulting from the operation of the truck off road.

I understand the above warnings brought to me by Big Green Truck Pizza and accept full responsibility for any damage and towing charges should they result.
